COURSE DESCRIPTION

The EMR course covers all techniques of emergency medical care presently considered within the responsibilities of the EMR, as well as operational aspects of the job which they will be expected to perform. The course consists of approximately **28 lessons** involving approximately **90 hours** of classroom and field training. Specific objectives of the course are: 1) teach students the overall role and responsibilities of the EMR in performing both the emergency care and operational aspects of the job; 2) develop student skills in patient assessment and all emergency treatment procedures, and 3) develop student skills in the use and care of all equipment required to accomplish the job. The course is taught to the most current National EMS Education Standards.

PREREQUISITES

This course is designed for all individuals desiring to provide emergency medical care with an ambulance agency or other pre-hospital rescue service, routinely providing emergency care. Persons enrolling in the course are required to read, write, and have good oral command of the English language. Enrollees must be sixteen (16) years of age by the end of the class. **Proof of a Booster Tetanus shot within ten years and a current TB test within one year are required.**
