COURSE DESCRIPTION

The EMT course covers all techniques of emergency medical care presently considered within the responsibilities of the EMT, as well as operational aspects of the job which they will be expected to perform. The course consists of 44 lessons involving 130 hours of classroom and field training. Specific objectives of the course are: 1) teach students the overall role and responsibilities of the EMT in performing both the emergency care and operational aspects of the job; 2) develop student skills in patient assessment and all emergency treatment procedures, and 3) develop student skills in the use and care of all equipment required to accomplish the job.

PREREQUISITES

This course is designed for all individuals desiring to provide emergency medical care with an ambulance service or other pre-hospital rescue service, routinely providing emergency care. Persons enrolling in the course are required to read, write and have good oral command of the English language. Enrollees must be sixteen (16) years of age prior to completing the State Certification Exams that are scheduled for this course. **A photo ID must be presented on registration night.**
