

2020 Fall/Winter Advanced EMT Hybrid Course Registration

August 1, 2020

Dear A-EMT Candidate:

Thank you for your interest in our upcoming A-EMT program. The primary focus of the Advanced Emergency Medical Technician is to provide basic and limited advanced emergency medical care and transportation for critical and emergent patients who access the emergency medical system. This individual possesses the basic knowledge and skills necessary to provide patient care and transportation. Advanced Emergency Medical Technicians function as part of a comprehensive EMS response, under medical oversight. Advanced Emergency Medical Technicians perform interventions with the basic and advanced equipment typically found on an ambulance. The Advanced Emergency Medical Technician is a link from the scene to the emergency health care system.

This course comprises over 300 hours of classroom, hands-on, and field training alongside some of our area's most experienced EMS and health professionals. From our state-of-the-art training center, we train over 3,000 EMS and allied health professionals a year in everything from CPR to Advanced Cardiovascular Life Support and trauma resuscitation.

Upon successful completion of the didactic, practical skills, clinical, and field internship components of this course a student will be authorized to take the National Registry of Emergency Medical Technicians (NREMT) psychomotor and cognitive examinations.

Please take a moment to read carefully through this registration packet, complete and sign the registration form, and return it along with the registration fee to the address listed below. Fax or email registration will be accepted if paying by credit card. Once your registration is processed you will receive confirmation as well additional information regarding any pre-course requirements. If you have any questions, please feel free to contact me directly. Thank you.

Sincerely,

Robert Rutkowski, NRP
EMS Program Director
